

# Changes in vacation accounting as of 07.09.2023

As of 07.09.2023, changes will come into effect in the fields in the "Vacation accounting" area, which affect the factoring of vacation entitlement when entering or leaving the company and the addition date of vacation entitlements.

The following changes have been made:

## Factoring of the entry year

In the future, the following options will be available in the "Factoring of entry year" field:

- No
- Legally compliant (Austria)
- Aliquot
- Part-time

The options

- No / partial parental leave, resignation
- Legally compliant (Austria) / Prorated maternity leave, resignation
- Aliquot / Proration of parental leave, resignation

are no longer available and will instead be transferred to the new parameter "Proration of leaving or maternity leave" (checkbox).

## Reference date of the addition

Here there is a new field "Addition of annual entitlement" with the following choices

- Entrance year
- Calendar year

If neither the one nor the other selection option is suitable, there is still the possibility to enter a separate date in the "Alternative date of addition" field.

The inventory data is transferred as follows:

Existing fields / check	Conversion to new fields
Date "Alternative cut-off date of addition" = entry date (comparison on day / month).	Addition of the annual entitlement: entry date Alternative date of addition: will be deleted
Date "Alternative cut-off date of addition" = 01.01.	Addition of the annual entitlement: calendar year Alternative date of addition: will be deleted
Date "Alternative key date of addition" = empty, but basic entitlement filled in	Addition of the annual entitlement: calendar year
None of the above criteria	Alternative cut-off date for addition: remains unchanged
