4.64.27

Release Notes - Webdesk - Version 4.64.27 - August 5, 2026

New Features

Time & Attendance

- [WD-21477[1]] - Introduction of new API endpoints for team queries with a separate, paginated listing of persons and a separate query of the time tracking status.

Improvements

Interfaces

- [WD-20914[2]] - Improvement of the overview of the status of active jobs, with runtime and error status displayed on the overview page.

Bug Fixes

Time & Attendance

- [WD-21870[3]] - Fix for an issue where inactive or no longer valid persons were also displayed in the search in the attendance table.
- [WD-21690[4]] - Fix for an issue where time tracking bookings with universal error reasons could fail on some systems.

Project Time Tracking

- [WD-21852[5]] - Fix for an issue where the hierarchical view in project time tracking did not load and no selection was possible.

Travel Expense Tracking

- [WD-21832[6]] - Fix for an issue where daily deductions for international trips were no longer taken into account in the 24-hour calculation.

HR Expert

- [WD-21862[7]] - Fix for an issue where, when a termination was withdrawn, the stored script was not executed, which could leave incorrect vacation balances in place.
- [WD-15136[8]] - Fix for an issue where document permissions in the payroll process prevented access to generated payroll documents.

User Settings

- [WD-21839[9]] - Fix for an issue where selection list values could be lost if module texts for the default language were missing.

Mobile App

- [WD-21869[10]] - Fix for a display issue where files and folders in the mobile file explorer did not take up the full screen width.

- [WD-21860[11]] - Fix for an issue where uploading attachments failed on iOS devices in the travel expense report and doctor's request areas.

Performance

- [WD-18834[12]] - Optimization of load times and performance when displaying and editing tasks and approvals.

Other Bug Fixes

- [WD-21867[13]] - Fix for an issue where uploading .ttf fonts was not possible despite supposedly being supported.
- [WD-21863[14]] - Fix for an issue when using branch names containing a slash, which led to incorrect Jenkins links in the system.

Miscellaneous

- [WD-21821[15]] - Added a new view that displays the historical time tracking configuration (weekly program, part-time factor, daily target times) per person in a clear dialog.
- [WD-21511[16]] - Extension of logging so that changes to daily and weekly programs in time tracking are traceable.
