Ptm Cost Object Effort Connector

This connector is used to import **project time services already booked to cost objects** into the system or to export them to a file.

Fields to be mapped:

activityShortName	Refers to the activity booked in the project
costObjectForeignId	Foreign key for linking the cost object with third-party systems
costObjectName	Name of the cost object for which booked services are to be exported/imported
CustomerShortName	Short name of the customer
day	Day for which project time services on the cost object are to be exported/imported
effortUid	UID of the project time service
employeeId	ID of the employee who performed project time services on the cost object
projectCode	Project code of the project whose time is to be assigned to the cost object
timeAmountInMinutes	Time in minutes - project time to be assigned to the cost object
timeAmountInMinutesOriginal	Time in minutes that is/would be intended for this project on this cost object
timeEffortComment	Comment on the project time booking to the cost object
