Ptm Effort Connector

This connector makes it possible to export **project times** to a file or import them from a file into the system.

The fields that can be mapped here are:

$activity	Activity of the project time to be imported/exported
$customer	Customer assignment (if available) of the project time to be imported/exported
$person	Person who booked the project time to be imported/ exported
$project	Project to which the project time to be imported/ exported refers
$this	This field is developer-specific and cannot currently be used by the user/administrator
amountInMinutes	Duration in minutes of the project time to be imported/exported
chargeable	false/true: is this project time billable?
comment	Free comment on the booked project time
costObjectAccountingDone	
createdBySystem	true/false: was the project time booking made automatically by the system?
dayDate	Date on which the project time to be imported/ exported was booked
foreignID	Foreign key for connecting to various third-party systems
fromTime	Start time of the project time to be imported/ exported
status	
toTime	End time of the project time to be imported/exported
