Ptm Customer Connector

This connector makes it possible to **export customers** in the context of project time tracking to a file or to **import** them from a file.

The fields to be mapped refer to the common customer data that also must be entered when creating a new customer in the system - when exporting, e.g., to a CSV file, these are the terms in the top row:

$client	Client in the system to which the customer belongs
$this	This field is developer-specific and currently cannot be used by administrators/users
city	City/town
contactPerson	Contact person at the respective customer
country	Country
description	More detailed description of the customer
mail	Email address of the customer
name	Name/company name of the customer
phone	Phone number of the customer
shortName	Short name for the customer
streetAddress	Street name
type	*internal* or *external*
website	Website of the customer
zip	Postal code of the customer

Felder

Name	Wert
Modul	Project Time Management (ptm)
Webdesk Actionname	PtmCustomerConnector
Artefakt-Typ	Connector
