

# Job getAbsenceTextModules

Der Job "Get Absence Text Modules" hat die Aufgabe, Textbausteine für alle Fehlgründe im Zeitwirtschaftssystem zu erstellen, allerdings nur für die voreingestellte Sprache.

The screenshot shows a web-based configuration interface for a job. At the top, there is a header with a clock icon and the word 'Job'. Below this is a navigation bar with four buttons: 'Speichern', 'Speichern & Schließen', 'Zurück', and 'Job starten'. The main configuration area is divided into two sections. The first section contains three fields: 'Name' with the value 'getAbsenceTextModules', 'Aktiv' with a dropdown set to 'Nein', and 'Beschreibung' with a text area containing the text 'generates Textmodules for all the AbsenceReasons inside the TA System. (but only for the default language!)'. The second section is titled 'Trigger' and contains a table with three columns: 'Zeitplan Typ', 'Einstellungen', and 'Löschen'. The 'Zeitplan Typ' column has a dropdown menu set to 'Täglicher Trigger'. The 'Einstellungen' column has two rows: 'Stunde' with a dropdown set to '20' and a checkbox, and 'Minute' with a dropdown set to '00'. The 'Löschen' column has a checkbox. Below the table is a section titled 'Neuer Trigger' with a dropdown menu set to 'Nichts gewählt'.

Eine detaillierte Beschreibung zu den allgemeinen Job-Parametern finden Sie im Kapitel **Jobs**.
