4.59.28

Release Notes - Webdesk - Version 4.59.28 - May 28, 2025

Improvements

Appraisal Interview

- [WD-18867[1]] - The validation of the appraisal date can now be disabled so that appointments can also be recorded retroactively. In addition, process definitions and the editing options within the activity were improved.

HR Expert – Person Creation

- [WD-18868[2]] - Introduction of a system parameter for disabling the new HRX person creation dialog to work around problems with customer-specific required fields.

Bug Fixes

- [WD-18630[3]] - Fix for an error message when changing the absence reason if no person was selected.
- [WD-18713[4]] - The selection list for person/group/client could not be opened in role editing.
- [WD-18405[5]], [WD-18879[6]] - In evaluations (*ta_getOrgJournal*), the name of the affected person or the header table was not displayed in certain cases.
- [WD-18804[7]] - Fixed an error in time tracking on Saturdays in the correction client when the weekly maximum field is active.
- [WD-18829[8]] - Correction of an error when reading account values in systems with a period as the decimal separator.
- [WD-18871[9]] - Fix for a problem when calculating travel expense reports due to conflicting travel time assignments.
- [WD-18876[10]] - Correction of the display of active steps in assistants as well as hover effects in the standard menu.
- [WD-18772[11]] - The HRX view "All Persons" now also displays future entries correctly.
