R3.7.5

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [WD-1130[1]] - Stopwatch must change customer when project is changed
- [WD-1593[2]] - Projecttime-booking field "project" is not wide enough
- [WD-1596[3]] - Projekttime / ptm_doProjectTimeBooking: Flag "billable" is not set automatically
- [WD-1597[4]] - getOrgTravel: Hiding of orgstructures does not work
- [WD-1608[5]] - Problems caluclating max working time after holiday (easter monday)
- [WD-1615[6]] - Display correct error-message when booking fails on time-mobile APP
- [WD-1621[7]] - Validation for overlapping is not working
- [WD-1642[8]] - PoManageFileTransfer: Hibernate exception about query of TmTravelConnector
- [WD-1650[9]] - WdTravel: Stacktrace in Workflowlist / Processdetails
- [WD-1651[10]] - Exception in CalendarTimeRangeRepairer
- [WD-1655[11]] - NPE exception when trying to access a travel from the travelFolder
- [WD-1667[12]] - Regression: CalendarIntervalRepairer swallows parts of AbsenceEntry intervals with open end

Improvement

- [WD-1531[13]] - CheckMaxWorkingTime: Possibility to define absence reasons where a notification should be sent
- [WD-1611[14]] - Possibility to get number of days with a given absence code for a specified time period
- [WD-1654[15]] - Missing Error message when server not available and current action is stateless
