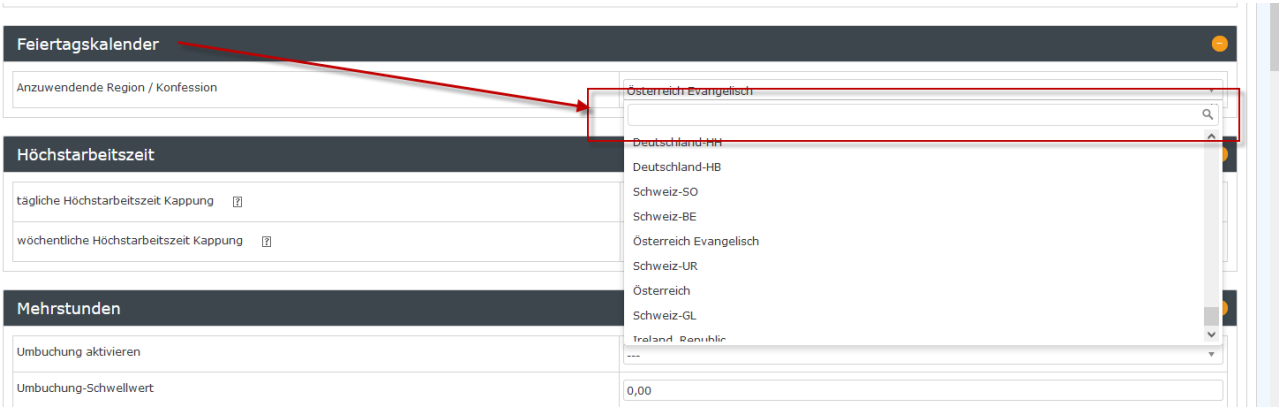
New Features in 4.57.0

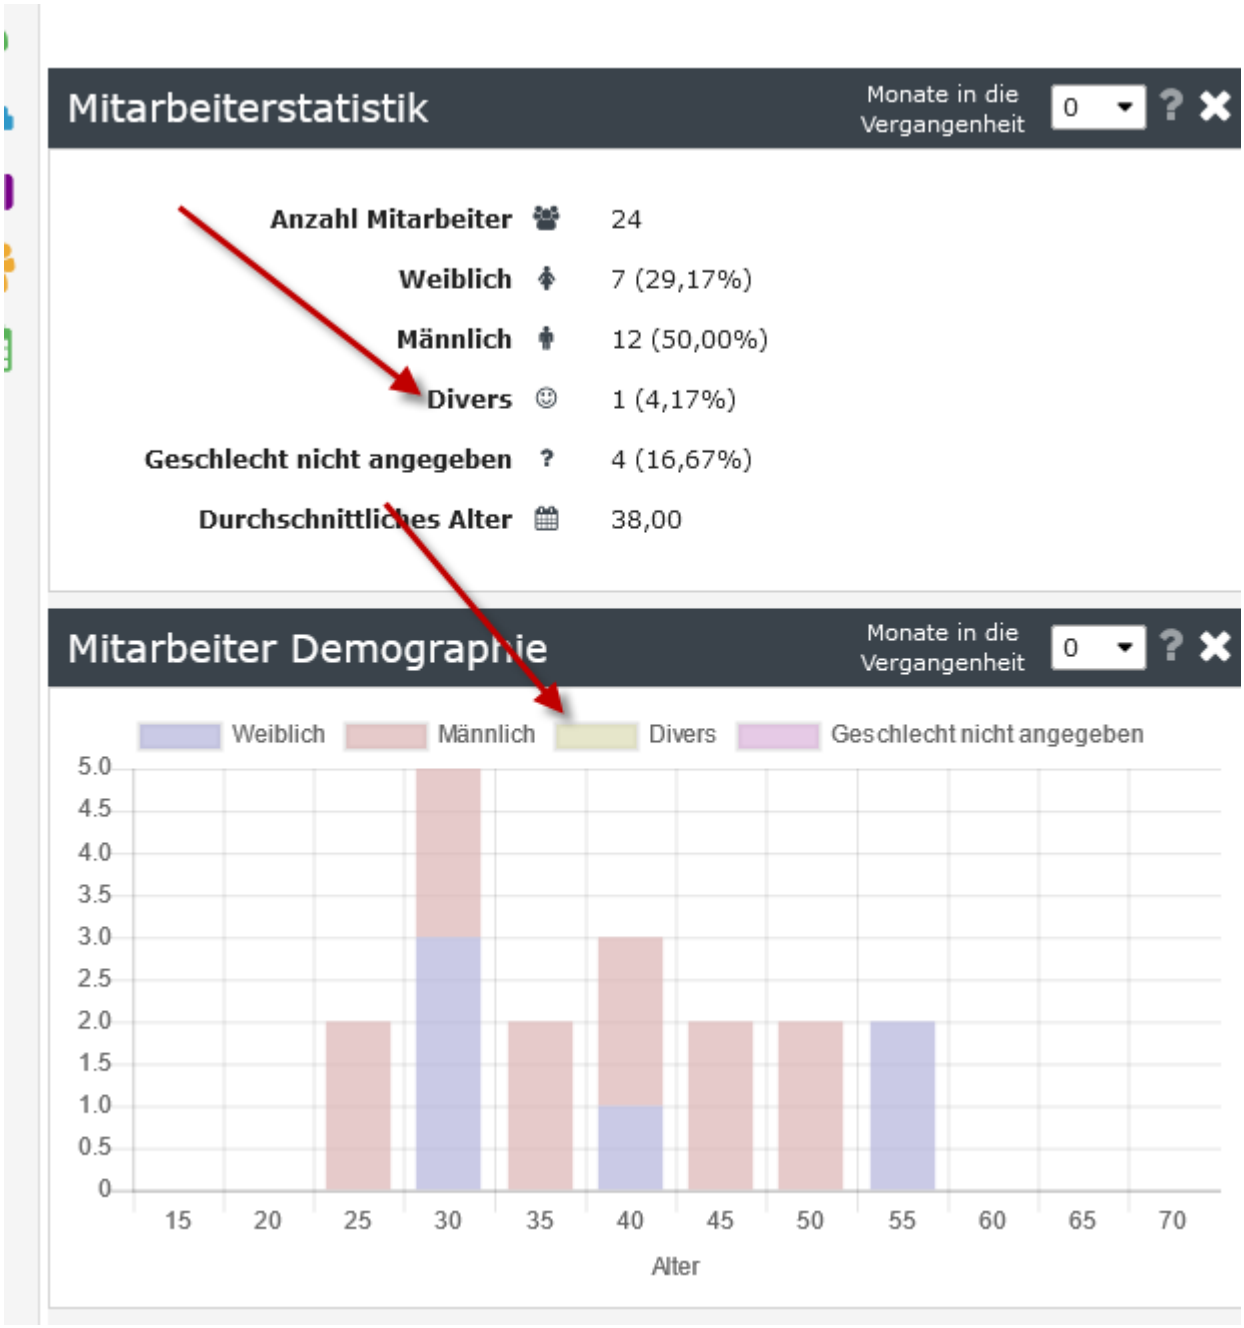
Search function for the holiday calendar

A search function was added to the selection list of the region to be applied for the matching holiday calendar in po_showPersons.act/Settings/Time Tracking/Holiday Calendar, which now allows you to find the matching holiday calendar more quickly.



Gender "diverse"

The gender "diverse" is now also visualized in the display of the employee statistics and employee demographics on the HR Expert dashboard.



The avatar of persons without a profile picture now also has a gender-neutral design:

Company-paid meals in business trip settlement

With this release, when settling business trips, it is now possible in the "Daily Deductions" block to record the deduction for meals paid by the company for all days of the trip with a single click, or to set all meals of one type (breakfast, lunch, dinner) to "unpaid" for all days of the trip. In addition, the "No meals paid by the company (deductions)" function was moved to the top.
Especially for long business trips, this simplifies entering the settlement, since it is no longer necessary to decide separately for each meal on each day of the trip.

Weekly working time in the weekly program selection list

The selection list of weekly programs for a person, which is offered under Persons/Settings/Time Tracking, now also shows the weekly working time. This makes it faster to find the matching program, especially since the working time can also be used for the search function.
