R3.7.9

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [WD-1796[1]] - Regression in FormUtils causes problems in *ALL* OrgTree based reports
- [WD-1804[2]] - ta_getJournal: columns in pdf view get really small and mixed up with neighbouring columns
- [WD-1848[3]] - Mobile Project Time app shows a completely white screen
- [WD-1857[4]] - TmRecordBase: getCorporateAmount() does always return the full amount of the record
- [WD-1859[5]] - Regression: Automatic timecorrections possible in multi-day travel
- [WD-1860[6]] - Regression: Travelform timecorrections - absencecode translation missing
- [WD-1861[7]] - Report Project efforts: Direct export to PDF / Excel is faulty
- [WD-1875[8]] - Fallback for custom workflow's actionlogs not having special workflow vars
- [WD-1876[9]] - tm_getOrgTravel.act: Pure personal viewpermissions trigger wrong behavior

Improvement

- [WD-1839[10]] - TmCurrencyService Enhancement
- [WD-1858[11]] - TmTravelDecorator: new method to get all record specials NOT paid by company

IT Help

- [WD-1871[12]] - Widget Tree 'orgList.mvfield' has no value
