4.52.24

Release Notes - Webdesk - Version 4.52.24 - February 29, 2024

Bug Fixes

- [WD-16669[1]] - Fix for an issue that occurred under the following circumstances: automatic creation of TA persons is disabled and HR-TA synchronization is enabled with the mode "TA activation on person". As a consequence, when TA was activated for a person, the fields for editing were displayed, but the configured assignments were not applied
- [WD-16621[2]] - Fix for an issue in HR Expert that blocked further processing during the following actions: edit a person's employment status # save # click "Edit" again # open the Time Tracking tab # click Cancel
- [WD-16620[3]] - Fix for an issue in HR Expert where the synchronization of the HR Expert time tracking settings to a newly created person with time tracking was not performed
- [WD-16525[4]] - Fix for an issue in HR Expert, in the "Employment start" area on the dashboard and in the "Hires/Terminations" report, that prevented persons from being displayed under certain conditions tied to a position assignment
