4.59.5

Release Notes - Webdesk - Version 4.59.4 - March 4, 2025

Bug Fix

- [WD-18399[1]] - Values of accounts with the unit "Days" are now displayed correctly in the Excel export. Previously, these values were visible in the view but were missing from the Excel export. The error occurred in the ta_getOrgJournal module and was fixed, so that all relevant data is now exported completely.
