4.59.7

Release Notes - Webdesk - Version 4.59.7 - March 6, 2025

Bug Fixes

- [WD-18453[1]] - The synchronization with TaSyncCalendarDates no longer creates duplicate all-day appointments in Outlook.
- [WD-18458[2]] - Fixed an error that caused a LazyInitializationException when editing and saving travel expense requests in the production environment.
- [WD-18442[3]] - Fixed a display issue in the booking list where the "FE" column in English overlapped with "PM".
- [WD-18452[4]] - Fixed an error in the Newcomers REST endpoint that was caused by a date parsing problem.
