4.64.5

Release Notes - Webdesk - Version 4.64.5 - June 19, 2026

Bug Fixes

Time & Attendance

- [WD-21107[1]] - Fix for an issue where validation scripts in time tracking could fail when the variable "context" was used.
- [WD-21104[2]] - Fix for an issue where validation rules for time bookings related to absences could fail.
- [WD-21103[3]] - Fix for an issue in the data processing of time accounts that could lead to error messages under certain circumstances.

Travel Expense Tracking

- [WD-21102[4]] - Fix for an issue where unfilled fields for international trips could cause the request to be aborted.
- [WD-20860[5]] - Fix for an issue where not all columns for daily deductions were displayed in the print view of travel expenses.

Permissions

- [WD-21105[6]] - Fix for an issue when granting view permissions via derived roles that could lead to error messages.

Login / Logout

- [WD-21097[7]] - Fix for an issue where session control did not work correctly in certain scenarios when load balancing with mod_jk.

Other Bug Fixes

- [WD-21106[8]] - Fix for an issue where faulty geolocation data generated unnecessary error messages in the logs, with no impact for users.
