4.64.42

Release Notes - Webdesk - Version 4.64.42 - September 17, 2026

Bug Fixes

Time & Attendance

- [WD-22385[1]] - Fix for an issue where planned and unplanned vacation hours in the virtual accounts were incorrect with hour-based calculation and on special days such as December 24 and December 31.
- [WD-22282[2]] - Fix for an issue where remarks and details in the absence detail view were not displayed even though pseudonymization was not active.

Project Time Tracking

- [WD-22100[3]] - Fix for an issue where the change history for project time entries from past months could not be displayed.

HR Expert

- [WD-22392[4]] - Fix for an issue where deactivating a position failed.

Login / Logout

- [WD-22389[5]] - Fix for an issue where the loss of the SSO session during Ajax requests was not detected and no new login was triggered.
