4.59.27

Release Notes - Webdesk - Version 4.59.27 - May 20, 2025

Bug Fixes

- [WD-18753[1]] - An error message occurred when opening the GDPR configuration via the sadmin menu on systems without an HR license. Access to the configuration now works as expected even without the HR module enabled.
- [WD-18681[2]] - Roles assigned to a person with a future validity date were incorrectly not displayed under "Roles". This behavior was corrected – roles that become valid in the future are now displayed accordingly.
- [WD-18802[3]] - Fixed errors in the travel expense report calculations.
