4.18.0

Release Notes - Webdesk - Version 4.18.0 - December 4, 2020

Bug

- [WD-11664[1]] - Bug fix: It was not possible to use project time tracking if the TACon was not running properly
- [WD-11883[2]] - Bug fix: The page navigation was not displayed properly for system messages
- [WD-11975[3]] - Bug fix: The configurable block on the start page did not work after new REACT actions

New Feature

- [WD-11513[4]] - MS Graph API: Webdesk now supports the Microsoft Graph API
- [WD-11595[5]] - Limited number of absence requests per absence reason: It is now possible to set the maximum entitlement for any absence reasons in absence requests.
- [WD-10712[6]] - Definition of a type for cost centers: Any types can now be added to cost centers
