4.64.11

Release Notes - Webdesk - Version 4.64.11 - June 30, 2026

New Features

Time & Attendance

- [WD-20820[1]] - Error messages for validation problems in the annual calendar are now forwarded correctly to the user interface.

Improvements

Travel Expense Tracking

- [WD-20248[2]] - Improvement of the deduction rules for trips to take into account multiple, consecutive business trips in accordance with legal requirements.

Other Improvements

- [WD-21213[3]] - Improvement of the internal development workflow for automatically optimizing code quality for static Java imports.

Bug Fixes

Time & Attendance

- [WD-21220[4]] - Fix for an issue in the time tracking settings where technical information could unexpectedly be displayed in the user interface.
- [WD-20622[5]] - Fix for an issue where multi-day absences entered directly were incorrectly displayed as single-day absences.

Project Time Tracking

- [WD-21195[6]] - Fix for performance issues in the project time tracking module that could lead to long load times.

Travel Expense Tracking

- [WD-21172[7]] - Correction of the layout display of routes and stays in the travel expense tracking area.
- [WD-20751[8]] - Fix for an issue where an error dialog was displayed under certain circumstances when saving a trip draft.

HR Expert

- [WD-21226[9]] - Fix for an issue where error messages could occur during the Excel export of the employee list in HR Expert.
- [WD-21088[10]] - Fix for an issue where changes to the contract type were not saved for planned employments.

Kiosk

- [WD-21223[11]] - Fix for an issue that prevented the Webdesk user interface from being displayed in the kiosk iFrame.

UI / UX

- [WD-21101[12]] - Fix for issues with missing or inconsistent branding manifests and application icons, which prevents error messages in production.

Miscellaneous

- [WD-21206[13]] - Adjustment of the internal build environment for better isolation of parallel development environments when using Maven.
