4.64.38

Release Notes - Webdesk - Version 4.64.38 - September 8, 2026

Bug Fixes

Time & Attendance

- [WD-22252[1]] - Fix for an issue where, after a group was removed from the selection, its persons were still displayed.
- [WD-21177[2]] - Fix for an issue where exporting a vCard failed for persons without a stored user photo.

Reporting

- [WD-22273[3]] - Fix for an issue during report export where missing configurations for the geckodriver are now named explicitly.

User Settings

- [WD-22274[4]] - Fix for an issue where REST queries for persons failed if no taxable kilometers for the commute were stored.

UI / UX

- [WD-22254[5]] - Fix for a display issue where certain buttons were not highlighted in color in the legacy theme.

Other Bug Fixes

- [WD-22167[6]] - Optimization of test behavior: errors when starting test database containers are now detected faster and cause further attempts to be aborted immediately.
