4.64.49

Release Notes - Webdesk - Version 4.64.49 - October 13, 2026

Improvements

Other Improvements

- [WD-22840[1]] - Addition of a function for the automated creation and revision of pull request descriptions for Webdesk PRs.

Bug Fixes

Time & Attendance

- [WD-22849[2]] - Fix for an issue where, for IF6020 employees, the names of absence and booking reasons were not displayed in Journal V2, the organization journal, and the REST interface for time bookings.

HR Expert

- [WD-22808[3]] - Fix for an issue where dynamic additional fields in the contract type form were displayed multiple times if the user was not logged in as sadmin.

Interfaces

- [WD-22713[4]] - Fix for an issue where exporting connectors and linked connectors via the import/export function could result in an error message.

Miscellaneous

- [WD-22827[5]] - Adjustment of the build pipeline so that WebSDK model deviations no longer block the CompileOnly build but are only reported as a notice in the standard process.
- [WD-22860[6]] - Creation of a reusable validation function for local Webdesk ticket checks, including documentation and automated verification workflows.
