4.63.7

Release Notes - Webdesk - Version 4.63.6 - March 3, 2026

New Features

Kiosk

- [WD-19679[1]] - Added a new kiosk variant with a floating menu button and a customizable welcome page to improve usability in kiosk mode.

Bug Fixes

Project Time Tracking

- [WD-20304[2]] - Fix for an error message when recording project times via autocomplete, which occurred because of a non-bookable project.

Time & Attendance

- [WD-20190[3]] - Fix for an issue where fields in the vacation request form were not loaded during an ongoing process.
- [WD-20047[4]] - Correction of the incorrect calculation of vacation days in the annual calendar with deviating working time models.
- [WD-19262[5]] - Fix for an error where vacation usage was missing in the print view and the form did not load completely when opened.

Login/Logout

- [WD-19492[6]] - Fix for an issue with the cluster capability of login tokens, so that automated report logins now also work across other cluster nodes.
