# 4.63.8

Release Notes - Webdesk - Version 4.63.8 - March 10, 2026

## Improvements

### Travel Expenses

- [WD-20147[1]] - Improvement: For travel expense reports, the start region of a trip can now be selected manually.

## Bug Fixes

### Time & Attendance

- [WD-19394[2]] - Bug fix: Invalid bookings are now displayed correctly in the 6020 view for time corrections.

### Travel Expenses

- [WD-20365[3]] - Bug fix: In travel expense reports, the VAT amount is now correctly retained when the region is changed.

### Interfaces

- [WD-20357[4]] - Bug fix: Batch jobs now correctly start linked connector link synchronizations so that current data is adopted from the source files.

## Miscellaneous

- [WD-20380[5]] - Security improvement: The HTTP header 'X-Cocoon-Version' is no longer disclosed in order to avoid security risks.
