4.39.0

Release Notes - Webdesk - Version 4.39.0 - March 29, 2022

Bug

- [WD-13008[1]] - Fixed an issue in the header of the calendar dashlet in the dashboard.
- [WD-13411[2]] - Fixed an issue that made too many trip types available in travel folders.

New Feature

- [WD-12498[3]] - Context menus can now be used in the annual calendar.
- [WD-13241[4]] - New option for the GW-Office365 integration: When removing GW configurations, it is now possible to remove all events that Webdesk created in Outlook.
- [WD-13616[5]] - It is now possible to assign multiple action permissions at the same time.
- [WD-13589[6]] - It is now possible to assign multiple role permissions at the same time.
- [WD-12390[7]] - New option in the correction client to automatically use all available daily programs.

Improvement

- [WD-13526[8]] - Improved layout in the new JournalV2 PDF export.
- [WD-11854[9]] - Removed redundant client names from the HR-Expert org tree.
