4.62.0

Release Notes - Webdesk - Version 4.62.0 - December 15, 2025

Improvements

Time & Attendance

- [WD-19229[1]] - New function for recording trip itineraries via custom trip segments, with automatic generation of legs and mileage reports.
- [WD-18027[2]] - New rule for calculating the international meal allowance in accordance with ARV: from the 15th day, the allowance is reduced by 10% for longer stays.

Performance

- [WD-19833[3]] - Improvement of Java compatibility by embedding Nashorn, to enable operation with Java 17.

Bug Fixes

Time & Attendance

- [WD-19872[4]] - Fix for an error where trip segments from a travel request were lost after conversion into a travel expense report.
- [WD-18026[5]] - Implementation of the BRKG rule for the domestic meal allowance: from the 15th day, the daily allowance is reduced by 50% for longer stays.

HR Expert

- [WD-19817[6]] - Fix for an error message when starting a new payroll run, which was caused by a faulty SQL call.

Permissions

- [WD-19826[7]] - Fix for an error that led to an error message and a blocked user interface when checking permissions for non-existent actions.
