4.61.2

Release Notes - Webdesk - Version 4.61.2 - October 13, 2025

Improvements

- [WD-19530[1]] - The display of field groups (groups for master data fields) in the time tracking settings of persons in Webdesk and HR Expert is now sorted alphabetically to improve clarity.

Bug Fixes

Errors When Saving and Displaying Fields

- [WD-19493[2]] - An error message occurred when saving field groups with new, non-persisted fields.
- [WD-19512[3]] - In HR Expert, personal fields of type KeyValueType were not displayed as selection lists as expected.

Errors in Time Correction and Time Tracking

- [WD-19468[4]] - An error message occurred when starting a time correction with an empty additional row.
- [WD-19520[5]] - In pure project time tracking systems, the date field was no longer displayed in the overview project time editing form.

Additional Bug Fixes

- [WD-19499[6]] - An error message occurred when switching to the next record in linked connectors with "TmTravelConnector" as the source.
- [WD-19510[7]] - Saving employment contracts with client assignments resulted in an error message.
