4.13.0

Release Notes - Webdesk - August 14, 2020

Bugs

- [WD-10376[1]] - The job ProcessSystemNotifications did not detect irregularities correctly
- [WD-10639[2]] - Users in HR-Expert were not displayed in the list of active employees when the employee is currently in a secondary employment
- [WD-11011[3]] - Groups could not be created in HR-Expert for clients that use group prefixes
- [WD-11150[4]] - The HrPersonConnector could not import an IBAN unless the BIC was also imported
- [WD-11249[5]] - Page numbers were not displayed in HR-Expert reports
- [WD-11307[6]] - "GROUP BY" could not be used in SQL-based reports
- [WD-11390[7]] - The JournalV2 did not translate all columns
- [WD-11413[8]] - The print view in ta_getOrgJournal did not work
- [WD-11430[9]] - Improved the layout of the Time Tracking tab in HR-Expert
- [WD-11494[10]] - History tracking does not work in ta_getOrgJournal when the interval is only one day
- [WD-11559[11]] - Travel types could not be saved when the option "Show cost centers" was changed
- [WD-11205[12]] - Fixed a display issue where a € was missing in the print view of business trips

New Features

- [WD-11448[13]] - Added a selection option so that client administrators receive an email as soon as users delete their profile pictures.
- [WD-11372[14]] - New option for ta_CorrectionClient: Absence codes can now be defined; if a day only has these codes, it is not possible to edit accounts for this day

Improvement

- [WD-10620[15]] - The system parameter TmOptions.useFirstTravelTypeAsDefault is now also available at the client level
- [WD-10642[16]] - The job ExecuteAndStoreReports can now filter processes by their status
- [WD-10823[17]] - 30-day trial version clients now have uniform prefixes where possible
- [WD-10971[18]] - The system parameter HrPersonDomainObjectReaderOptions is now also available at the client level
- [WD-11176[19]] - The system parameter Move TmOptions.validateKmBillClashesPerVehicle is now also available at the client level
- [WD-11199[20]] - Legislations can now be assigned to multiple clients more easily
- [WD-11225[21]] - If users do not have permission to edit their profile picture, the profile picture mini icon is not displayed to them either.
- [WD-11227[22]] - Profile pictures can now be managed via the user settings.
