4.6.0

Release Notes - Webdesk - Version 4.6.0 - June 2, 2020

Bug

- [WD-10318[1]] - Bug fix: When copying an action, not all text modules were copied.
- [WD-10881[2]] - Bug fix in travel expense reports: Error message when there were no travel types for the selected period.
- [WD-10981[3]] - Fixed an issue where the name of the "Show archived" button in the weekly program list did not change accordingly when switching between the archived and the active weekly programs.
- [WD-11016[4]] - Error message when opening a travel expense report saved as a draft from the to-do list.
- [WD-11059[5]] - Fixed an issue in HR-Expert where an empty page was displayed when the language was changed and the client was then switched.
- [WD-11159[6]] - Fixed an error message when editing/saving a person in HR-Expert.
- [WD-11208[7]] - Fixed an error message when ending a person's employment in HR-Expert.
- [WD-11148[8]] - Fixed an issue with travel folders where an error message was displayed when no travel folders could be created for the selected period.

Improvements

- [WD-11163[9]] & [WD-8506[10]] - All users are set to the Responsive skin and the option to change the skin is removed.
- [WD-10393[11]] - When changes are made in HR-Expert, the weekly program and the part-time factor are compared with the employment status and, if necessary, a new weekly program is suggested.
- [WD-10689[12]] - The employment and time tracking tabs in HR-Expert can now be opened independently of each other.
- [WD-10793[13]] - Unified the date validation in travel folders and travel expense reports.
- [WD-10901[14]] - Introduced a new function that makes it possible to select an alternative booking time to compensate for travel time to and from the workplace.
- [WD-10932[15]] - The address name of travel destinations is now displayed in travel reports.
