4.59.3

Release Notes - Webdesk - Version 4.59.3 - February 25, 2025

Improvements

Optimizations in Messaging and Approval Processes

- [WD-18253[1]] - Inactive or terminated users no longer receive ACKN messages.
- [WD-17789[2]] - In the journal approval process, relevant information is now summarized in the details.
- [WD-18275[3]] - Absence reasons in the ta_CorrectionClient configuration are now searchable.
- [WD-18285[4]] - The estimated working time is now used for performance optimization in the dashboard and on the booking page.
- [WD-17327[5]] - Initial research on publishing an iOS app embedded in Webdesk was carried out.
- [WD-18368[6]] - The EVM tool agent now takes the ranking of role holders into account when replacing terminated persons in charge.

Bug Fixes

Bug Fixes in Journal and Absence Modules

- [WD-18251[7]] - Creating a new person in the hrx-person-wizard now also works without errors with required fields that have form customizations.
- [WD-18334[8]] - Fixed an error when accessing the journal with the account "vktagkto".
- [WD-18329[9]] - The annual calendar no longer tries to load additional absence reasons when the corresponding feature option is disabled.
- [WD-18345[10]] - Fixed the faulty PDF export of the journal on high-resolution screens.
- [WD-18377[11]] - Fixed a security issue in the REST endpoint for absence intervals.
- [WD-17575[12]] - Corrected the display of selection fields with a double listbox setting in process forms.
- [WD-18235[13]] - The buttons for monthly approvals are now also displayed when the start of the TA matches the earliest permitted month.
- [WD-18237[14]] - The CSV export of account columns in JournalV2 now shows the correct values instead of "object Object".
- [WD-18241[15]] - Filters in the orgJournal can now be hidden but remain active and affect the results.
- [WD-18267[16]] - Booking absences via the time-mobile-app now creates consistent bookings.
- [WD-18293[17]] - The time display on kiosks now uses the server time zone if no other is configured.
- [WD-18307[18]], [WD-18321[19]], [WD-18335[20]] - Fixed several ConcurrentModificationExceptions in various modules.
- [WD-18333[21]] - The role selector for ACKN messages now correctly takes the "hideFromLocalAdmin" flag into account.
- [WD-18339[22]] - Fixed an NPE on failed on-prem Exchange login, and the cause of the error is now logged correctly.
- [WD-18343[23]] - Fixed an error when booking "Absent" during "Attendant" status in the time-mobile-app.
- [WD-18344[24]] - The selection of time reasons in the correction and absence clients is now consistent with version 4.58.

- [WD-18360[25]] - The "syncCalendarDates" job now correctly synchronizes absences with Outlook/O365.
- [WD-18370[26]] - Fixed an NPE in SimpleDataListHelper.loadAndParseSDLColumnTypes.
- [WD-18380[27]] - Fixed a problem with "XXXXX" in calculation comments for German travel expenses.
- [WD-18381[28]] - Fixed an error when opening dialog popups in the attendance tableau with an invalid locale.
