4.59.4

Release Notes - Webdesk - Version 4.59.4 - March 3, 2025

Improvements

Optimizations in Messaging and Approval Processes

- [WD-18385[1]] - The type of reminders in the journal approval process (email, workflow to-do, or both) can now be configured.
- [WD-17738[2]] - The region names in the daily deductions are now translated correctly.

Bug Fixes

Bug Fixes in Journal and Absence Modules

- [WD-16977[3]] - The user experience for time entry in the mobile correction client was improved to prevent the time picker from closing unexpectedly.
- [WD-18082[4]] - Manually added comments in the correction client are now correctly included in the total number of comments.
- [WD-18388[5]] - Fixed an exception when opening the group calendar.
- [WD-18389[6]] - Comments in the day view mode of the correction client are now displayed correctly.
- [WD-18390[7]] - The attendance tableau can now also be opened without a GW license.
- [WD-18392[8]] - Removed an incorrect message in the journal approval popup.
- [WD-18404[9]] - Journal V2 no longer adds an additional hour when the account is negative.
