4.5.31

TLDR

- Fixed several errors in business trip requests
- Fixed an error in the calculation of vacation entitlement when more than one absence reason is defined as vacation in the system
- Shorter loading times when editing projects if more than 10,000 projects exist in the system
- The 30-day trial form now also works on Internet Explorer
- Fixed several errors in the time tracking administration
- Client-specific prefixes are now also enforced correctly in HR-Expert
- New action for editing absence reasons
- New options for configuring the profile page of persons
- Fixed display errors in HR-Expert
- Fixed display errors on iPad
- Improvements in the Payroll Services module
