R3.7.16

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [WD-1674[1]] - Request equipment / cost center is ignored (auto-complete broken)
- [WD-1817[2]] - Addtional fields are missing when automatically adding a record from the travel request to the travel expense

Improvement

- [WD-1734[3]] - Webservice that returns an autocomplete-label for an entity-UID
- [WD-2146[4]] - EVM: new field "Reference" in the event assistant, change label of the "Cost center" field
- [WD-2148[5]] - EVM: Extend the Planon interface with the field "Reference"
- [WD-2149[6]] - EVM: Output of the field "Reference" in various emails (daily sheet and others)
- [WD-2150[7]] - EVM: In equipment rental, show cost center long name, change label, add field "Reference"
- [WD-2151[8]] - EVM: New column "Reference" in the equipment report
- [WD-2178[9]] - Ease possibility to override EhCache Settings for certain Caches

New Feature

- [WD-2145[10]] - EVM: Show the long name of the respective selected cost center to the right of the "Cost center" selection field
