R3.8.1

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [WD-1558[1]] - Different icons for actions in responsive
- [WD-1992[2]] - Open the highlighted menu folder on reload
- [WD-2142[3]] - Personalwolke Webdesk doesn't recognize available "master records" correct
- [WD-2224[4]] - Wrong customer choosable in project time booking
- [WD-2256[5]] - NPE in Travel-Validation
- [WD-2278[6]] - Exception when trying to create new Project and choosing parent directly (without using tree)
- [WD-2336[7]] - Exception on Executing $resetPassword in Connector
- [WD-2356[8]] - SaxParseException when trying to edit editRebookingsV2 action configuration
- [WD-2357[9]] - ta_editRebookingsV2.act - problem with validation on non-rendered field
- [WD-2360[10]] - getOrgProcessInstances contains unnecessary block for from/to dates
- [WD-2364[11]] - Regression in Calendar export as PDF/Excel
- [WD-2377[12]] - Define hr-expert licencing
- [WD-2416[13]] - Summary is active by default for some field types in reports

Improvement

- [WD-2300[14]] - Refactoring organigram to MVP: bringing all presentation logic from view classes to presenter and introduce a model

New Feature

- [WD-2341[15]] - Extend ta_getCalendar.act with additional columns to display holiday entitlements and accounts: fieldname with date

Task

- [WD-2170[16]] - New licence for READ-ONLY HRX Users, correct Licence Check for normal HRX Users
- [WD-2302[17]] - Set parent reference into a newly generated organigram bean
