4.58.2

Release Notes - Webdesk - Version 4.58.2 - July 30, 2024

Bug Fixes

- [WD-17333[1]] - Fix for a graphics issue that caused the Personalwolke logo to be displayed oversized when Personalwolke is used on mobile phones
- [WD-17213[2]] - Fix for an issue in the HTML editor that occurred in the System Message application as soon as an image was to be inserted into the system message via copy&paste
- [WD-17337[3]] - Fix for a regression in an update script that caused certain parameters in the job plans area to be reciprocally available
- [WD-17256[4]] - Fix for an issue in Travel Management that caused an area irrelevant for read-only permission to be displayed in the read-only view of business trip settlements

Improvement

- [WD-17210[5]] - Added the ability to attach additional fields to the object HrPersonLegalPermit (permits), e.g., to enable the creation of certain evaluations
