Ptm Cost Object Connector

This connector makes it possible to export **cost objects** to a file (as a source connector) or import them from a file (as a target connector).

The following fields must be mapped:

name	Name of the cost object to be imported into the system or written to a file.
foreignID	Foreign key, to be imported or written to a file, serving as a link to third-party systems.
description	Description of the cost object to be transferred into the system or exported from it.
$costCenter	Cost center to which the cost object to be imported or exported is to be attached.
$this	This field is developer-specific and cannot be used by the standard administrator

Felder

Name	Wert
Modul	Project Time Management (ptm)
Webdesk Actionname	PtmCostObjectConnector
