Ptm Project Connector

This connector makes it possible to export **projects** to a file or import them from a file.

Fields to be mapped:

$parentProjectCode	Code of the parent project
$structure	Project structure to which the project is/is to be assigned
$this	This option is developer-specific and currently not available to administrators/users
$type	Element type of the project
_Kostenfaktor	Option to insert information from configurable attributes (e.g., importance, cost factor, coffee break, etc.). An underscore _ before the text signals that this is a freely selectable attribute
_Termingebunden	--- // ---
_Wichtigkeit	--- // ---
allCustomersOfClientSelectable	true/false: should all customers stored in the client be selectable?
bookable	true/false: is the project bookable?
chargeable	true/false: can project time for this project be marked as billable?
code	Project code
description	More detailed (full-text) description of the project
effortChargeableByDefault	true/false: is the project marked as billable by default?
name	Name of the project
plannedEffort	Planned number of hours for the project
shortName	Short name of the project
totalPlannedEffort	Planned number of hours for the project including its subprojects
validfrom	Date - project valid from
validto	Date - project valid until

Felder

Name	Wert
Modul	Project Time Management (ptm)
Webdesk Actionname	PtmProjectConnector
Artefakt-Typ	Connector
