Assign Project Permissions

To assign **permissions** to book to a specific **project**, as an administrator access the project overview via

MODULES
--> Project Time Tracking
--> Projects

Select the desired project and click the **"Permissions" tab** to get to the permission overview. Here you will find an overview of all permissions already assigned for this project, as well as the option to **delete** and **modify** existing permissions and, of course, to **assign new ones**. To do so, proceed as follows:

1) Click the "Add permission" button

2) Select the permission type (should an entire client, a group, or an individual role/persons receive the permission?)

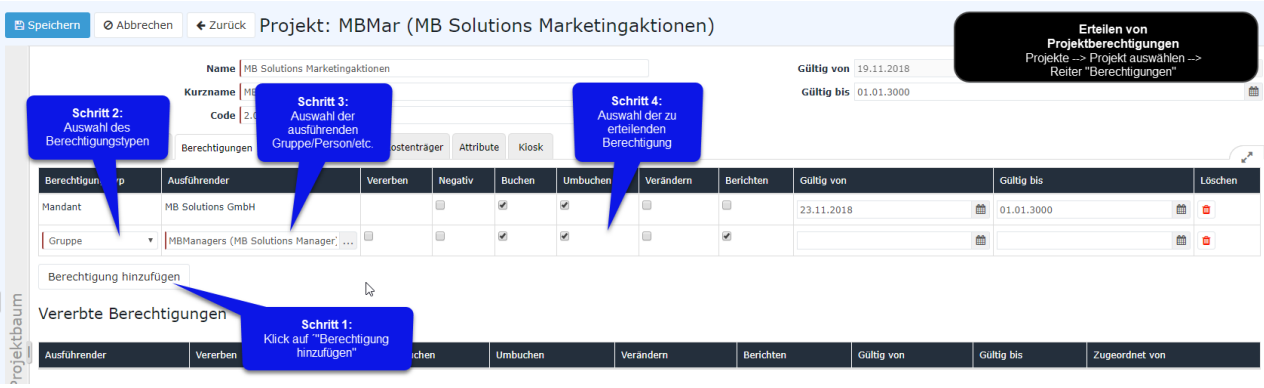

3) Select the client/group/person/role that is to receive the permission

4) Select the permission type (multiple possible)
More information on the various permission types[1]

5) Select "valid from" (if nothing is entered here, the current date is assumed)

6) Select "valid until" (if nothing is entered here, the longest possible validity is assumed)

Assigning project permissions:

1. /daisy/personalwolke-admin/8102-dsy.html?language=4#dsy8102-dsy_Arten der Berechtigung
