

Update 2021-06-16

Upgraded to version 4.28.0.

This resolved the tickets of the following versions:

- [4.27.0](#)¹
- [4.28.0](#)²

General Changes

#1 New Functions in Person Administration in the "Modules" Tab

The options for email notifications about new tasks are now available and editable in person administration under *"Administration" - "Persons" (select the relevant person) - "Modules" tab - "Workflow Tasks" dropdown menu*.

In addition, a further option has been added where you can select whether you should also receive email notifications about new tasks as a substitute. If you want this, you must select "For every new task" in the dropdown menu in row 1 so that row 2, "I would also like to receive an email notification as a substitute", appears. There you then select "Yes".

#2 Showing and Hiding the Project Time Settings

As an administrator, you can configure in the client settings which options in the project time area are displayed to employees (= area outlined in red). This gives employees an even more compact and user-friendly view.

Are you interested in hiding this area? Our consultants will gladly take care of the switch for you. Simply contact us at sales@workflow.at.
