

Update 2021-11-30

Upgraded to version 4.35.1.

This resolved the tickets of the following versions:

- [4.34.3](#)¹
- [4.35.0](#)²
- [4.35.1](#)³

#1 Selection of Open Requests

In the open requests, under the "Show/Hide Filter" button, the "Requester" field now shows only those persons from whom you actually have an open request. This makes the laborious search for persons easier and enables even more efficient work.

#2 Output Format Changes from .xls to .xlsx

The output format has been changed from .xls to the new standard .xlsx. For large amounts of data that need to be processed and analyzed, this file type is indispensable. This makes it easier to find the information you need and to sort it in different ways.
