

# Group calendar

## General

Via the **group calendar**, the user is shown all planned and consumed full-day and half-day absences of a defined group of persons (usually his department).

This view is intended to ensure smooth leave and absence planning within a defined group of persons (department).

Unauthorized absences are displayed in red and approved absences in black.

The user can query the group calendar using the **time unit** week / month or the **specified period** (displays the desired month). The month can be changed with the arrow buttons.

In the group calendar, each staff member sees the colleagues from his or her department or, according to his or her viewing authorisation, also colleagues from other departments.
