

Journal

General

The **journal** includes all important personal time information for a month, showing the current month up to the present day. One line includes the entries and certain account values per day. The journal is kept in normal minutes, i.e. a break deduction of 0.30 corresponds to 30 minutes.

With the help of the arrow keys, one can easily switch between months and thus display data from previous months. A specific month can also be selected directly from the drop-down menu.
