Use of the filter

This document demonstrates the **operation of the filter function** using the example of "Uncompleted requests¹". However, the same options are also available for "Open ToDos"

The filter function (Show Filter) allows you to search for specific requests in the workflow lists.

This function is available for

- every staff member for their own requests and processes
- owner of the role "Personal" for all employees within their area of competence
- owner of the role "Manager" for all employees within their area of competence
- local administrators for all employees of the organization

| Perform marked actions | 2 Refresh Selection | • • Q Show Filter | O Hide Progress | | | | | 🔒 Print |
| ToDo assigned | , | Author of Process | | \$ Activity | Details | Progress | Action(s) | |

Now click on the button to open the input screen.

Using the following parameters (search criteria) you can then search for the relevant request:

• Author of Process

Here you can search for a specific applicant > selection of the desired person (process author) from the list of names.

• Group

With this parameter, you can select a specific group (e.g. management or marketing), or search in all groups.

Process

Search for a specific process (for example, all vacation requests of a desired person > Process vacation). If you want to see all requests, select "All processes" as parameter

• Creation date from / to

Search for requests with a specific creation date (it is possible to enter either from - to date, or for example only to date to see all requests submitted up to a specific date)

• Effect date from / to

All applications whose validity period is valid from the from date are displayed. In addition, you can limit the effective date with the to-date parameter.

The "Open ToDos" area contains an additional filter function: the status of the task can be selected under "Selection".
