

# Where can I find information on inactive persons?

It is always possible to query persons, where the [overview list of persons](#)<sup>1</sup> is used to search for a person.

This overview list also offers the option of displaying inactive persons:

In this table, there is a column labeled “Active user”. The default selection here is “--”, meaning that all employees are displayed, regardless of their activity status as a user.

Clicking on the arrow opens the selection list, and you also have the option of selecting “inactive”.

--> The list of inactive users is now displayed.

This option for selecting inactive persons is offered in the following functions:

- [Persons overview](#)<sup>2</sup> (Administration --> Person)
- [Correction client](#)<sup>3</sup>
- [Absence client](#)<sup>4</sup>
- Reports by using the favorites and adding persons in the search mask of the reports [LINK will follow soon]

This gives you several options for retrieving personal data as well as data from the time recording of inactive employees.
