

Booking

General informations

The **booking mask** offers the user the possibility to create time bookings (Present (Absent) / Business Trip / Doctor visit / Official trip).

The date and time are taken from the web server, and the correct booking rhythm (Arrived / Left) is determined by the system. In addition, absence reasons can also be booked (business trip, doctor visit, official trip).

Furthermore, a message can be entered that is visible to colleagues in the **attendance list**.

Examples: Business trip - visit to a customer; present - in meeting / conference, etc.

The screenshot shows the 'Booking' application interface. At the top, there are three buttons: 'Do booking', 'Refresh', and 'Show Journal'. Below these buttons, the 'Booking state' is displayed as 'Absent'. The main area is divided into two panels: 'New booking' and 'Today bookings'. The 'New booking' panel contains the following fields: 'Date' (07.06.2021), 'Time' (09:04), 'Bookingrhythm' (Arrived), 'Reason' (a dropdown menu), and 'Note' (a text area). The 'Today bookings' panel shows a table with two columns: 'Bookings' and 'Reason'.

The "**Show Journal**" button can be used to provide an overview of the entire monthly journal.

To hide the journal again, click on the "**Hide Journal**" button. This appears automatically when you click on the "**Show Journal**" button.

A successful booking is acknowledged by the server with a message, if errors occur a corresponding error messages appear.

If you want to go straight to the booking screen, it would be helpful to place the following link https://personalwolke.at/webdesk3/ta_doBooking.act in the browser's favourites. This way you can jump directly to the booking screen.
