

# Vacation filter (>5 days)

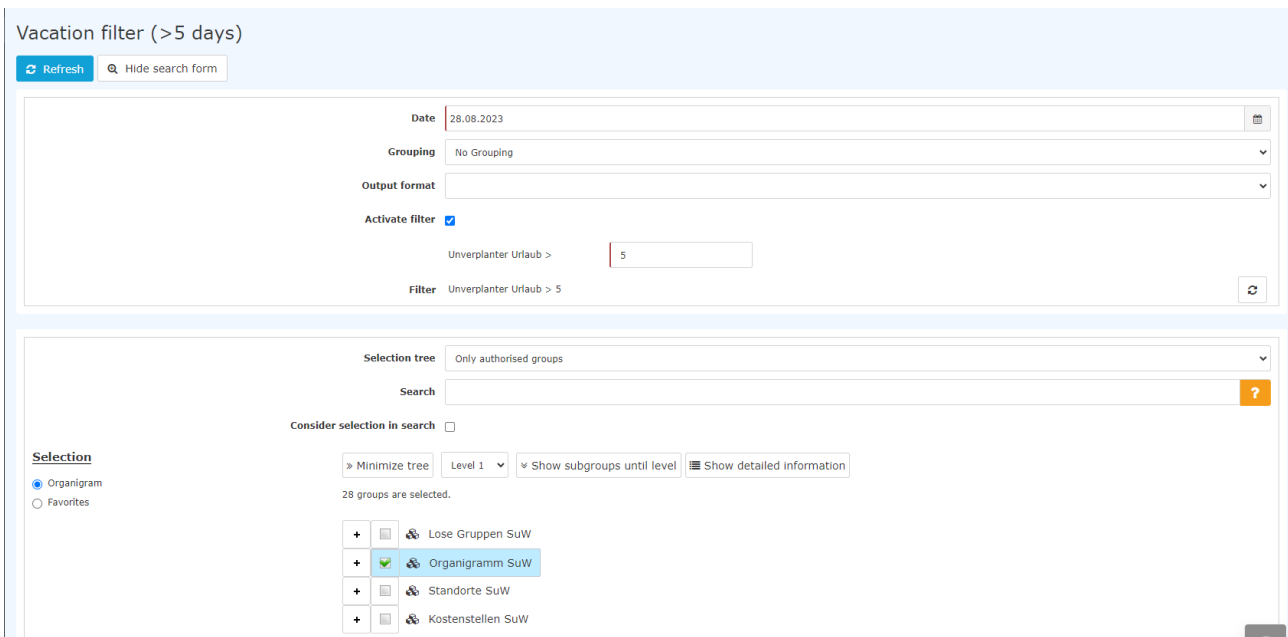

## General

This menu item provides the user with a list of those employees who have more than 5 days (> 5 days) remaining vacation on the selected key date.

The explanation of the [display of the vacation filter](#)<sup>1</sup> can be found after the explanation of the search mask.e.

## Search form

A screenshot of the 'Vacation filter (>5 days)' search form. The form is light blue and contains several input fields and controls. At the top left, there are 'Refresh' and 'Hide search form' buttons. The main form area includes a 'Date' field with '28.08.2023', a 'Grouping' dropdown set to 'No Grouping', an 'Output format' dropdown, and an 'Activate filter' checkbox which is checked. Below this is a field for 'Unverplanter Urlaub >' with the value '5'. A 'Filter' label shows 'Unverplanter Urlaub > 5'. At the bottom, there is a 'Selection tree' dropdown set to 'Only authorised groups', a search bar, and a 'Consider selection in search' checkbox. Below the search bar are buttons for 'Minimize tree', 'Level 1', 'Show subgroups until level', and 'Show detailed information'. A status message says '28 groups are selected.' and a list of groups is shown, with 'Organigramm SuW' selected.

The following search filters are available:

- **Date**

Any date in the past is possible.

- **Grouping**

This parameter allows choosing between: No grouping, level 1, level 2, level 3, level 4

- **No grouping:** all users are displayed in alphabetical order.
- **Level 1:** all selected groups and users are grouped below the 1st node and then displayed

- **Level 2:** analogous to level 1, all users below the 2nd node are displayed here
- **Level 3 and 4:** analogue to level 1 and 2
- **Output format**

If this parameter is set to print version, you will get a print-friendly output of the list.

- **Activate Filter**

Per default activated checkbox. The number of vacation days can be changed.

- **Selection tree**

This parameter provides the following choices: "Only authorized groups" and "All groups".

**All groups:** displays all groups of the company, even if the user is not authorized to view all of them.

**Groups with viewing permission:** displays all groups that the user is authorized to view.

- **Search**

If a search term is entered, a search is made in all groups for which there is an authorization to view. It is possible to search for a complete name (family name and or first name) or for a part of the name. The result then contains all possible family names as well as first names and is highlighted in color.

- **Consider selection in search**

Basically, all groups for which an access authorization exists are searched when an entry is made in the Search field.

If you check this option, only the groups selected under "Selection" will be searched.

- **Selection**
