

Project efforts

General information

The structure of this menu item is similar to the one described in the chapter [My Project Times](#)¹. The menu item **Project efforts** is visible for those persons who have been assigned the correction "Reports" for one or more projects via project permission.

Display individual bookings and expand report

The result of the query can be expanded by clicking on 

i.e. each individual booking is displayed in the corresponding period.

In order to better illustrate the effect of the individual parameters, this action was performed for all screenshots. Here is the only exception:

The search mask

The screenshot shows the 'Projektaufwände' (Project Efforts) search mask. It features a header with a folder icon and the title. Below the header is a navigation bar with 'Abfrage' (Query) and 'Suchvorgaben verbergen' (Hide search criteria). The main area contains various input fields and controls:

- Von** (From): Date field set to 01.07.2015 with a calendar icon and a star.
- Bis** (To): Date field set to 31.07.2015 with a calendar icon and a star.
- Struktur** (Structure): Dropdown menu set to '---'.
- Projekt** (Project): Text input field with a dropdown arrow and a red 'X' icon.
- Kunde** (Customer): Text input field with a dropdown arrow and a red 'X' icon.
- Ansichtsvariante** (View variant): Dropdown menu set to 'Projektzeit nach Mitarbeiter'.
- Beschreibung** (Description): Text input field set to 'Report nach Mitarbeiter / Datum'.
- Verrechenbarkeit auswählen** (Select calculability): Dropdown menu set to 'Alle'.
- Projekthierarchie anzeigen** (Show project hierarchy): Dropdown menu set to 'Nein'.
- Alternativer Berichtstitel** (Alternative report title): Text input field.
- Ausgabeformat** (Output format): Dropdown menu.
- Auswahlbaum** (Selection tree): Dropdown menu set to 'Gruppen mit Einsichtsberechtigung'.
- Suche** (Search): Text input field with a search icon.
- Selektion bei Suche berücksichtigen** (Consider selection during search): Checkbox.
- Auswahl** (Selection): Radio buttons for 'Organigramm' (selected) and 'Favoriten' (Favorites).
- Navigation**: A set of icons including a blue circle with an upward arrow, a dropdown set to 'Tiefe 1', a green circle with a downward arrow, and a blue square with a grid icon.
- Summary**: Text indicating '5 Gruppen sind selektiert.' (5 groups are selected).
- Tree View**: A hierarchical list of groups with checkboxes and icons:
 - ☐ Lose Gruppen
 - ☒ Organigramm PP
 - ☒ PP-GF - Geschäftsführung
 - ☒ PP-BAS - Basis Services
 - ☒ PP-SUPW - Support Wien

From and To

These parameters are used by the user to set the time period to be queried. This can be done both by direct input (in dd.mm.yyyy format) and by clicking on the corresponding day in the calendar .

Structure

This is to be understood as the path under which the respective project can be found. Also starting with the prefix. However, since there is usually only one structure anyway, there is usually no need to make any changes here.

Project

It is possible to directly select projects by entering (parts of) the name/short name or codes. If the entered text cannot be clearly assigned to a project, a list of all projects corresponding to the input is displayed.

Alternatively, the list view of the projects can be opened by clicking

on 

This is explained in detail in the menu item [Project time booking](#)².

View variant

In this dropdown element you can decide whether the result of the query should be sorted by booking element (project time booking), chronologically by date, by project or by employee. The effect of this choice is shown under Evaluation Examples.

Selecting the billability

This parameter determines whether or not the system is to filter on the basis of billability. All: All projects are displayed regardless of their allocability. If you select Billable, only those projects are evaluated in the query that were previously defined as billable.

Display project hierarchy

This parameter is not available for selection if the Sorted by date option is selected under **View variant**. If Display **project hierarchy** is now set to *Yes*, the difference between projects and subprojects is clearly displayed in the result of the query (Hierarchy).

Display single bookings

If this parameter is set to Yes, the result of the evaluation gives you access to all your own bookings made for the respective projects / the selected project.

Alternative report title

The text entered here will later appear as the headline of the time report instead of the default report title "My Project Times".

Output format

If you leave this field blank, you get the output on the screen. Alternatively, the result can also be displayed as a print-friendly version or saved as a PDF or Excel file.

Selection tree

This parameter offers the following selection options: Groups with access authorization, All groups.

- **Groups with access rights:** Displays all groups that the user has access to.
- **All groups:** displays all groups of the company, even if the user is not authorized to view them all.

Search

If a search term is entered, the system searches in all groups for which access authorization exists. It is possible to search for a complete name (surname, first name) or for a part of the name. The result then contains all possible surnames as well as first names and is highlighted in color.

Include selection in search

In principle, all groups for which access authorization exists are searched when an entry is made in the **Search** field. If this option is checked, only the groups selected under **Selection** will be searched.

Selection

With this parameter, the user has the choice between organigrams and favorites, which can be created by the user himself.

- **Organigram**

- All folders marked with a plus (+) symbol can be expanded further to show the subunits.
- By **double-clicking**, all subunits are automatically checked.
- By clicking on the green arrow > **Display subgroups to depth** (depth 1-3) > all existing subgroups are displayed.
- Use the blue arrow > **Minimize tree** > to minimize this view again, only the parent groups appear on the screen.
- **Show details** > By clicking on the symbol, the selected groups are clearly displayed in a list to the right of the symbol 
Click again to hide the detailed information.
- Clicking the **query** button starts the search.

- **Favorites**

Using this parameter, each user can create their own favorites list, which can contain both persons and groups that are frequently queried. The Favorites list can be customized at any time.

- The same procedure is used for **groups**.

Evaluation examples

The following screenshots show the effects of some of the parameters described above.

In the screenshot above, the **View variant** parameter was set to **Sorted by booking element**. This results in a structure according to the individual projects. Each project time entry is displayed under the corresponding project - the entries are therefore only displayed chronologically within one project. The year and month of the booking are followed by the department and the name of the employee who entered the project time. This makes it possible to see exactly how the sum of the project expenses is made up.

In the screenshot above, the **View Variant** parameter has been set to **Sorted by Date** - so all project time entries, regardless of which project they concern, are displayed in chronological order. As described in the previous screenshot (Sorted by booking element), all employees are listed under the respective group names that were previously selected in the search mask under the **Selection** parameter.

In the screenshot above, the **View Variant** parameter was set to **Project Time by Project**. The example of the internal projects clearly shows that in this view variant not only the recorded project times of the logged in user, but also those of all other employees appear under the corresponding project.

Which employees are displayed here depends on which groups or persons have been selected in the project effort search mask under the **Selection** parameter.

In the screenshot above, the parameter **Display project hierarchy** was set to **Yes**. Subprojects (here: Workflow EDV) are displayed in the expanded view with line indent. Subprojects do not appear in the folded view.

Display single bookings: Yes

In the previous examples, the parameter **Display single bookings** was set to **Yes**. This means that all project time entries posted on that day are displayed under each date.
