

Project-Time

General information

The **Projekt-Time Modul** enables the user to book project times live via web or smartphone or to enter them afterwards.

For the second option the **project time recording mask** with integrated favorites function is available.

Users with **management** rights can also choose from extended **report functions**, which are described in detail under *Functions*.

The project management allows an arbitrarily deep structuring of the projects (superordinate projects, sub-projects,...).

The Functions in Detail:

Project time booking¹

Start project time recording live via stopwatch (also available as Smartphone App)

Enter project time²

Recording / correcting project times afterwards using the mask provided for this purpose

- **Info**

- **My project times**³

- Output of your own project time bookings, filterable according to various criteria*

- **Administration**

- **Projects**⁴

- Overview of all projects, creation of new projects, editing of projects*

- **Management**

- **Project efforts**⁵

- Function for project time manager to gain insight into all project times recorded in-house*

- **Project times of my employees**⁶

- Evaluation of the project times of all users*
