In this area, *private* and *business* telephone numbers and email addresses can be maintained.

Please note that the **business email address** of the employee is used by the system for all notification functions. Also a [Login](#)¹ with the **business** email address (instead of the user name) into the Personalwolke is possible, if the employee is an active user.

The telephone numbers maintained here can also be displayed in other views (especially the [Attendance list](#)² in time recording) if this has been configured by the administrator.

The recommended **input form** for this feature is +43 xxx xxxxxxxxxxxx

When using a smartphone, you can click on the phone number to copy it to the phone's call function and make a phone call by pressing the dial function.

Private addresses

The screenshot shows a software interface for managing private addresses. At the top, there are navigation tabs: Master data, System, Contactinfos, Time Acquisition, Organisation, Skills, Employment, Development, Finances, Education, Family, and Documents. Below these are sub-tabs: Phone and E-Mail, Private Addresses, and Office Address. The 'Private Addresses' sub-tab is active, showing a list of 1 item. The table has columns for Street, Zip code, City, Country, Valid from, and Valid till. The entry is: Wienerstraße 21, 3002, Purkersdorf, Austria, 30.11.2022, 01.01.3000. Below the table, there is a section for 'Former Relations (0 Items)' with a similar table structure.

In this section, **one or more private residential addresses** are entered and stored in a history.

Only one address can be marked as the **primary (registered) address** at any time. As soon as a new address is assigned to this attribute, HR-Expert automatically corrects the "Valid to" field of the address previously marked as primary.

The address is required for social security registration, or for any form of contract. The private address of the employee is also helpful for the coordination of any activity outside the company.

A **correspondence address** can be interesting if the employee is staying at a different address for a longer period of time, but is not registered there. An example of this could be that the tradesmen have to carry out a longer repair at the registration address.

Below the entry screen, the active residential addresses are displayed, including all entries whose validity has expired.

On this screen there are the two system buttons "New" for entering a new address and "Delete line" to remove an entry from the list.

Business address

The screenshot shows a software interface for managing business addresses. At the top, there are navigation tabs: Master data, System, Contactinfos, Time Acquisition, Organisation, Skills, Employment, Development, Finances, Education, Family, and Documents. Below these are sub-tabs: Phone and E-Mail, Private Addresses, and Office Address. The 'Office Address' sub-tab is active, showing a form with a checkbox for 'Synchronize Office Address with Location' which is checked. The form fields are: Office street address (Wagenseilgasse 14), Office ZIP code (1120), Office city (Wien), and Office country.

In this area, you maintain the current business address (employer's address / current usage site or office address). The address is required for the social insurance registration.

If you check the **Synchronize with assigned location** checkbox, HR-Expert enters the stored address (for the location). The prerequisite for this is an assignment to a location in the [Tab Organisation - Groups](#)¹ Organization - Groups tab, if these have been configured.

(In the example shown above the synchronize-feature is used. The address field is grayed, a changing of the address is only possible if the location addressed is changed or via de-synchronization.)

Instant messaging services

Dienst-Anbieter	Primärer Dienst	Benutzer-Name	Gültig von	Gültig bis
facebook	<input checked="" type="checkbox"/>	WayneJohn	19.07.2017	01.01.3000

In this tab you can enter **web services** (e.g. facebook, Skype, Google+).

In the text field "**Service provider**" you can specify which service it is, also for the **user name** a text field is provided. With a tick 1 service can get the status **primary**.

In this tab, the **validity period** is not adjusted by the system, but can be edited manually at any time.

Expired accounts are listed below.

On this screen there are the two system buttons "New" for entering a new address and "Delete line" to remove an entry from the list.

Web Profiles

Webadresse	Primäres Profil	Dienst-Anbieter	Gültig von	Gültig bis
www.facebook.com	<input checked="" type="checkbox"/>	facebook	23.08.2017	01.01.3000

Frühere Zuordnungen (0 Elemente)
