4.52.0

Release Notes - Webdesk - Version 4.52.0 - May 30, 2023

Time Tracking

- [WD-15430[1]] - Improvement of loading speeds for forms where either the supervisor must be selected, or that can be started for someone else.
- [WD-15446[2]] - The booking form is now refreshed automatically if the browser tab with this form was inactive for an extended period of time.
- [WD-15656[3]] - Loading of future bookings in the correction client can now be disabled.
- [WD-15203[4]] - Fixed an issue that caused the booking form not to display the correct time when the user is in a different time zone.
- [WD-15338[5]] - Bug fix when creating requests: forwarding requests without selecting a supervisor is possible; in such cases the request is submitted to the first-ranked responsible supervisor.
- [WD-15306[6]] - Bug fix in the Processes area for users authorized to submit requests also for other users: the loading time when creating the form for requests and for the person selection list was significantly reduced

Groupware

- [WD-11927[7]] - It is now possible to restrict external APIs to groups using a black/whitelist
- [WD-15329[8]] - Improvement of the end date calculation for Groupware events when several consecutive absences occur

Administration

- [WD-14813[9]] - The "Valid from" date of groups can now be edited during creation:
- [WD-14853[10]] - Fixed an issue that caused not all mandatory org groups to be validated when a person was created
- [WD-15432[11]] - Performance improvement when assigning permissions for projects
- [WD-15529[12]] - Fixed an issue that made it impossible to filter the default travel destinations by client
- [WD-15609[13]] - Fixed an issue that caused the "Hierarchical" option for org structures not to be loaded correctly - REGRESSION
- [WD-15157[14]] - Fields that are not relevant for administrators or could not be used by them were hidden, e.g. the ability to edit role badges.

HR Expert

- [WD-14916[15]] - The group selection of the full-time equivalent evaluation no longer contains cost centers and locations
- [WD-15506[16]] - Performance improvement of the irregularities list in HR Expert
- [WD-14273[17]] -Bug fix for the Certificates area: the assignment of certificates to a person was again restricted to one certificate per certificate group at a time.

- [WD-15152[18]] - Bug fix for the Qualifications area: uploading documents to a specific qualification is possible again.
