

# In-country travel expenses

---

Content of this chapter:

## General<sup>1</sup>

1. Traveldata<sup>2</sup>
2. Daily Discounts<sup>3</sup>
3. Kilometer allowances<sup>4</sup>
4. Records<sup>5</sup>
5. Calculated Costs<sup>6</sup>
6. Attachments<sup>7</sup>
7. Time correction<sup>8</sup>

Further information on the subject of business trip expenses can be found here (links will be available soon)

- [Abroad travel expenses](#)<sup>9</sup>
- [subsequent records entry](#)<sup>10</sup>
- [Workflow of travel expenses](#)<sup>11</sup>

## General

Once the business trip has been completed, the user has the option of filling in the **travel expense report** with the actual costs and travel times incurred.

Travel expense reporting can be started in two ways:

1. you have submitted a [request for business trip](#)<sup>12</sup> request that has "rested" until the business trip is completed and then transferred to your list of open tasks as a template for the travel expense report. This is then adjusted accordingly.
2. furthermore, it is also possible to request settlement directly via the menu item "**Travel expenses**" for employees who do not require approval for a travel request.

The business trip accounting comprises 7 steps, whereby the steps relating to travel data, costs and attachments are already known from the requests for business trips

### Navigation in the accounting menu:

You can jump in the program

- by clicking on the fields "Back" and "Next" or
- by clicking on the heading fields 1-7

#### WARNING

The following descriptions refer to the standard version of the business trip accounting. Due to the possibility of individualising this, there may be deviations in some places for the respective user with regard to the displayed fields / input options.

## 1. Travel data

The screenshot shows the 'Business trip expense' application interface. At the top, there are buttons for 'Start process', 'Save as Draft', and 'Back'. Below these are four tabs: '1 Travel data', '2 Kilometer allowances', '3 Records', and '4 calculated costs'. The 'Travel data' tab is active, showing a form with the following fields: 'Travel-Id' (text), 'Traveler' (Berger Barbara), 'from Date' (calendar icon), 'to Date' (calendar icon), 'Travel type' (dropdown), 'Start region' (dropdown), 'Start location' (text), 'Target region' (dropdown), 'Target location' (text), 'Travel reason' (text), and 'Description' (text area). Red dashes are placed on the 'from Date', 'to Date', 'Travel type', 'Start region', 'Start location', 'Target region', 'Target location', and 'Travel reason' fields. A yellow tooltip on the right side of the form explains 'Nightly allowances': 'Under "Nightly allowances" the number of private overnight stays (without invoice) is to be entered (rate according to the respectively valid rates according to EStG, proof of overnight stays by stating the name and address of the accommodation provider under description).

The fields marked with red dashes are mandatory.

The following must therefore be completed:

- **from Date**
- **to Date**
- **Travel type: In-county travel**
- **Start region:** This is set to the country in which the applicant's place of employment is located when selecting "in-country travel", i.e. Austria if the applicant's place of employment is Austria.
- **Target region:** This is set to the country in which the applicant's place of employment is located when selecting "in-country travel", i.e. Austria if the applicant's place of employment is Austrian
- **Start location:** Active entry of the start address of the journey, i.e. e.g. the business address or the private residential address.
- **Target location:** entry of the address, e.g. the hotel at the destination, a conference centre, a customer location, etc.
- **Travel reason:** mandatory entry
- **Description:** for further information
- **Nightly allowances:** If applicable, the number of private overnight stays (i.e. not in a hotel; without invoice; e.g.: with relatives / friends) in Austria must be recorded here. These overnight stays are usually compensated with a lump sum, which depends on the respective collective agreement.

After entering the dates of the start and end of the trip, another field opens for entering the times of departure and return (**from time/to time**).

The actual total duration of the trip must now be entered in this input mask.

Based on the entries in from date, to date, from time and to time, the **daily allowance** due is calculated.

The following example shows a completed first page:

No meals paid by company (no allowance discounts)

← Previous Next →

On this page, meals paid directly by the company are recorded, e.g. if you receive meal allowance or similar, which is offset against restaurant costs or similar in this way.

If this is not the case for you, please click on the line "No meals paid by company (no allowance discounts)". This will cause all checkpoints to be set to "No".

### 3. Kilometer allowances

If the journey or part of it was made by means of a private motor vehicle, you have the possibility to enter the data here.

Click on "Add kmbill-record" to open the input mask.

Business trip expense

Start process Save as Draft Back

**Travel summary**

<b>Traveler</b>	Berger Barbara	<b>Travel type</b>	in-country travel
<b>Travel date</b>	09.06.23 08:00 - 11.06.23 18:00	<b>Start/End</b>	Wagenseilgasse, 1120 Wien, Österreich / Messepl. 1, 4600 Wels, Österreich

1 Traveledata 2 Daily Discounts 3 Kilometer allowances 4 Records 5 calculated costs 6 attachments 7 Time corrections

There are no kmbills assigned

**+ Add kmbill-record**

The miles/kilometers to be accounted for are calculated automatically by entering the mileage at the beginning and end of the business trip (tax requirement). The starting point of the business trip is the place of employment or the place of residence closer to the destination. Persons transported (name) are to be entered in the amount of the actual miles/kms. Official rate for mileage allowance or mileage allowance for passengers according to the respective valid rates according to EStG. By paying the mileage allowance, all additional costs (toll, parking fees, garage) are covered by tax. A separate settlement of these additional costs therefore leads to taxation unless the journey was made by company car or company bus.

← Previous Next →

This is where the data is recorded:

Business trip expense

Start process Save as Draft Back

**Travel summary**

<b>Traveler</b>	Berger Barbara	<b>Travel type</b>	in-country travel
<b>Travel date</b>	09.06.23 08:00 - 11.06.23 18:00	<b>Start/End</b>	Wagenseilgasse, 1120 Wien, Österreich / Messepl. 1, 4600 Wels, Österreich

1 Traveledata 2 Daily Discounts 3 Kilometer allowances 4 Records 5 calculated costs 6 attachments 7 Time corrections

**Km billings**

	from Date	Route	Vehicle	from km	to km	Amount km	Num. of pass.	Amount/km passenger
1		Wagenseilgasse, 1120 Wie Messepl. 1, 4600 Wels, Os Wagenseilgasse, 1120 Wie + Estimated KMs:391	---					

+ Add kmbill-record

The following must be entered in the mandatory fields:

- **from Date**
- **from km:** Mileage of the vehicle at departure (or at the beginning of a daily stage)

- **to km:** Mileage of the vehicle after the return (or at the end of a daily stage)
- **Amount km:** is calculated on the basis of the mileage entered and cannot be overwritten

Additional inputs are required for

- **Num. of pass(engeres)**
- **Amount/km passengers**

as these are also included in the calculation of the kilometre allowance at best.

**Route:** The data for the starting point and destination are already entered, but can be edited and supplemented by using the buttons:

and

Clicking on

opens a link to Google Maps, which can be used to mark the stages of the journey. The total number of kilometres between the starting point and destination (or back) is also entered.

If the journey to or from the conference takes place over several stages, e.g. if several conference venues are visited on different days, each stage must be recorded separately by adding another kilometre allowance receipt.

In the example below, the journey to and from the conference is made by car and two other passengers were taken along, who travelled almost the entire distance.
