4.53.10

Release Notes - Webdesk - Version 4.53.10

Bug Fixes

- [WD-16010[1]] - Fix for an issue that caused a display error (widening of the first columns of a table) after previously opening the business trip form.
- [WD-16126[2]] - Fix for an issue in the jobs createRebookings and changeTimeModelAndFillupBookings
- [WD-16131[3]] - Fix for an issue that prevented the job TaGetAbsenceModules from being executed
- [WD-16149[4]] - Fix for an issue that impaired the proper functioning of help buttons in pop-up windows.
- [WD-16158[5]] - Fix for an issue in ta_getOrgJournal that occurred when using groupings.
- [WD-16196[6]] - Fix for an issue that prevented the "Edit project time" action from working on mobile devices.
- [WD-16205[7]] - Fix for an issue in ta_getOrgJournal that prevented the use of the Excel export with empty cells
